Re: UPDATE on Temporary Service Outage

SSP Railway and WSDOT have collaborated to expedite restoration of service due to loss of Bridge 6.1 on 08/16/21:

- All permitting and required engineering has been completed
- Debris from the old bridge has been removed
- New culvert pipe has been installed to replace a bridge structure
- Backfill and compaction is underway
- Track will be installed and tested this weekend

SSP Operations plans to resume service this coming Monday, August 23rd. No further update will be provided unless we deviate from this schedule.

Some pictures of the worksite from today have been included.
